Facility: _____ Department: _____ X-Ray Unit: _____

Quarterly X-Ray and Light Field Alignment

Date:	Initials:
-------	-----------

Place a cassette table top. Mark the edges of the light field with a penny on all four sides. Expose and process the film. Measure the difference between the edge of the x-ray field and the edge of the coin marking the light field.

Tolerance level 2% of SID = (SID)(.02)			
Side 1	Long side	Difference	
Side 2	Long side	Difference	

Add Difference 1 & 2 =

Is this less than tolerance level?

Side 3	Short side	Difference	
Side 4	Short side	Difference	

Add Difference 3 & 4 =

Is this less than tolerance level?

If answers to A & B are both Yes the test results Pass
If either A or B is no the unit Fails. (*Corrective action must be completed in 30 Days*)

Pass	Fail
